

# Backflush Instrument

with 25G blunt needle  
and active aspiration

Article No: 2281.AD05

**“We have been using the DORC backflush in the VR theatre in Bournemouth for almost a year. The instrument is designed with the demands of modern retinal surgery in mind. The backflush is lightweight, comfortable in the hand and simple to use. Another great development from DORC.”**

- **New ergonomical handle design to create optimal surgical control.**
- **Enlarged backflush reservoir.**
- **Overall more controlled and precise aspiration of intraocular fluids and/or debris.**

**Andy Morris FRCOphth,  
Consultant in Ophthalmology,  
University Hospitals Dorset**
